## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1,2,5,7-9 drawn to shadow mask, classified in class 313, subclass 402.
- II. Claims 3 and 4, drawn to method of manufacturing shadow mask, classified in class 445, subclass 47.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, such as the shadow mask can be manufactured outside the temperature range of 540 to 680 °C and without pickling.

Because these inventions are distinct for the reasons given above and (1) have acquired a separate status in the art as shown by their different classification, and (2) because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2879

A telephone call was made to Mr. Roger Browdy on 2/11/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
